

COSMOLOGY TERMS

Write down the terms from the descriptions below

Space School 

The pressure is so great inside me that nuclear reactions occur and this causes me to radiate light and heat

Cosmologists believe that at my centre is a massive object called a black hole!

I am a natural satellite of the Sun.
I need to be spherical in shape

I am a satellite of a planet. As far as the Earth is concerned, I'm the only one!

I orbit another star and my name is Kepler 452-b

I am a rocky odd shaped thing that can range from the size of a pebble to the width of a city!

I am probably the oldest object in the entire Universe!

Putting it mildly, I contain everything!
